Experlogix CPQ for NetSuite

Harness OOTB Sales

Complete integration with NetSuite Opportunities, Quotes and Orders are available the moment you install Experlogix. It's all available OOTB (out-of-the-box).

Intelligent Workflows

Experlogix can fire NetSuite workflows to route for discount approvals, engineering change requests and more.

Read from & Write to NetSuite

Let's say you need Experlogix to calculate a quote's gross profit and send that back to NetSuite for reporting. With clicks (rather than coding), it's done. What if you want Experlogix to recognize the account's country and only display products in that region to your rep? Get it done in minutes!

NetSuite Updates

If you're ready to take advantage of a new NetSuite release, rest assured we support the new version – there's never a delay.

We Respect the NetSuite UI

No matter which version of NetSuite you use, Experlogix matches the look of each NetSuite release. Why is this important? It provides a natural transition from NetSuite to CPQ for your users, shortens learning curves and increases user adoption. Wish we didn't match NetSuite? We've got other skins to choose from or you can create your own.
